

Google Meet Series One Board 65 by Avocor

Google Meet Series One Board 65 brings teams together to connect, create and collaborate.

As an interactive touch display, Board 65 seamlessly connects in-person and remote meeting attendees - enabling everyone in the room or on a call - to see, hear, and contribute equally to meetings.

Top 5 reasons to choose the Google Meet Series One Board 65 by Avocor for your Meetings:

1. Premium video conferencing experience

Board 65 features an all-in-one digital PTZ camera combined with a high-quality microphone and speakers for an outstanding video and audio experience so that everyone in the meeting room can be seen and heard clearly.

2. AI-based noise cancellation with TrueVoice®

Board 65 also includes TrueVoice which actively removes distracting noises and amplifies human voices from anywhere in the room.

3. Whiteboarding functionality

Enhance in-meeting collaboration and capture ideas together with built-in whiteboarding. Whiteboard, brainstorm, ideate and create your best work. With Board 65, everyone can contribute.

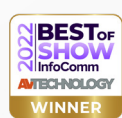

4. USB-C connectivity

Board 65 is optimized for Google Meet, but with pass-through via USB-C, you have the flexibility to use the video conferencing platform of your choice with the onboard peripherals including the camera, microphone, speakers, Ethernet, and power.

5. Integration with 3rd party applications

You can also use the touch capabilities of the Board 65 to conduct and host pass-through sessions on third-party collaboration apps such as Miro and T1V.
